Politics for children

We should not forget, that our loved government keeps silence over the great tragedy about children! 100.000 children are in NL vanishing each year in a giant hole, complaining bitterly. They want to see steps of the politicians to fill up the hole. But the politicians don't listen. Time to exchange these bad hearing politicians? To vote them away? Do you know the hole? Already heard something of the birth hole. A shrinking nation is missing health.

We make politics for children. And for public health.
New games for children. And a bit more.
